

What we do

Firstly, we optimise Customer Business Processes through automation, business rules engines, and new capabilities

Then we extend Customer ROI by using Agile Development, Agile Deployment, Agile Adoption, and Persona-based data driven decision making

Our Business Process Improvement (BPI) focus

- Supply Chain Processes
- Asset Management Processes
- People Management Processes
- Financial Management Processes
- Persona-based User Interfaces
- Work Force Mobility
- Google-like Searches
- Data Driven Decision Making
- Machine Learning Capabilities
- Predictive Statistics
- Data Validation and Visualisation
- Process Optimisation through automation and enhanced digitisation

Time Sheet & Expense Management

The Problems we solve

Timely single point of entry for

- Time sheet and labour costing data
- Leave requests
- Employee Expenses

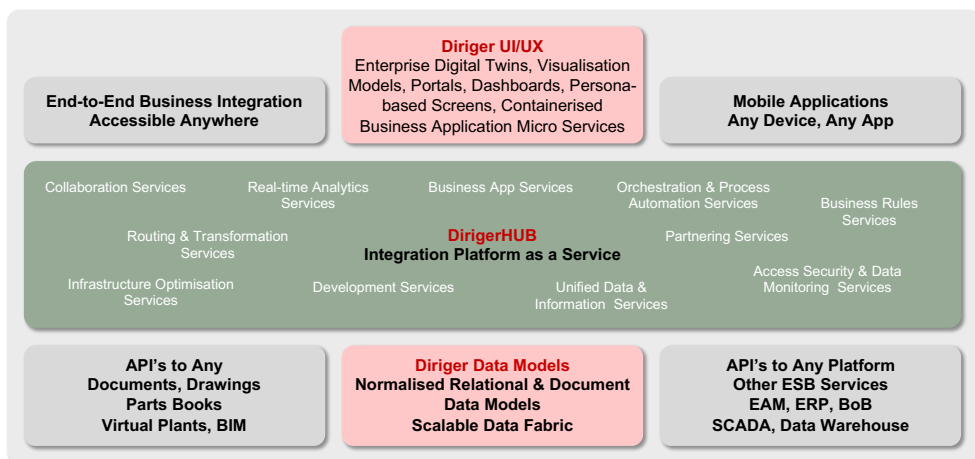

Secured, easy access portal for work flow & multi-level Approvals & Reviews

Configurable User defaults for location, projects, activities and costing

Our Real-time automation and visibility of the key transactions that impact your business processes and imperatives, leads you to immediate action points that

- Help focus corrective actions, benchmarking and continued monitoring
- Provide a capability for detailed transaction analysis, and
- Ensures that transactions are completed in accordance with prescribed workflow and business rules whilst building data quality and accuracy

Built on Diriger's Business Integration Platform

DirigerTSE (Time Sheet and Expenses) is part of Diriger's Business Productivity Suite for High Performance Organisations

DirigerTSE and its Benefits

DirigerTSE has been designed to make finding relevant data, key information, benchmarks and statistics EASY and FAST

- A secured User Interface provides immediate access to data relevant to an individual's business domain and related business imperatives
- Visibility through Dashboards and KPI's of all data to improve management, control and corrective actions
- Create pre-set status reports that execute on real-time data e.g. Project or Work Order filtering
- AI and Machine Learning processes reduce expense receipt loads to minutes instead of hours > AI based receipt read & load to save on data entry
- User 'Data Replication' capability to reduce admin overheads
- Show data anomalies and quality gaps in real-time; provides for immediate corrective actions
- Provides Quick filters, hierarchies, drill-downs and Google-like search capabilities
- Realtime dynamic business KPI's and Benchmarks

diriger.io

Process Overview and Capability

DirigerTSE provides

- Personalised information; detailed data visible to decision-makers in seconds (agile deployment)
- Procedure based interaction with extremely low training burden (agile adoption)
- Simplify analytics making data dissemination easier, faster and relevant
- Make it easier for Users - using Graphical User-based filters and tables to provide fast, easy access to the right data
- Reduce data collection activity through AI and Machine Learning capabilities that scan / read receipts and load data immediately through business rules & work flow automation.
- Rapidly search data using a *Google-like* User interface
- Deliver succinct information to a single screen
- Support standard corporate business rules
- Multi-Tenant cloud-based deployment
- UI/UX requires less cognitive load
- Data 'Export' to CSV files

Technology and Innovation with

- Problem solving capability
- Reliable outcomes
- Customer collaboration
- Effective and Ethical approaches

The screenshot displays the Diriger Time Sheets & Expenses interface. The top section shows a list of activities with columns for Contractor, Company, Project, Date, Task Type, Task Description, Hours, Approved On, Approved By, and Status. Below this, a detailed view of 'My Activities' is shown for the week of 2019-06-16 to 2019-06-22. This view includes a calendar for June 2019 and a table of activities with columns for Date, Project, Task Type, Task Description, and Hours. The activities table shows various tasks such as 'Public Holiday', 'Infrastructure Planning', 'Email Correspondence', 'Meetings', 'Architecture', 'Solution Design', 'Task Management', and 'P2S Document Review'.

Example real-time status reports that provide direct filtering to data visualisation tables and ease of data entry

Diriger Borrowed from Latin *dirigō*, *dirigere* ('to direct'), simplified into a first conjugation French verb
